

## Report on Industrial Visit – Morarjee Textile Mills, MIDC, Butibori (22.09.2017)

▶ Department of Electrical Engineering of Abha Gaikwad Patil College of Engineering, Nagpur (AGPCE) arranged a one day industrial visit at manufacturing facility of Morarjee Textiles at MIDC Butibori for the 50 students from fifth & seventh semester.

▶ The visit was arranged so that the students get a practical understanding of the various operations involved in the textile manufacturing and use of various components of electrical engineering such as transformers, isolators, switch gear protections etc. and can correlate the things that they have learnt in the theory subject.

Students & Faculties along with instructor of the Plant

▶ Drives form the core element of the Electrical Engineering and power system and to become a successful Electrical Engineer it is very essential to know the practical aspects of the power system. Department of Electrical Engineering of AGPCE also felt the urge to give the students a practical exposure so as to gain an in depth understanding of the theoretical aspects of the subject and also to give chance to the students about the latest trends in the manufacturing process of spinning yarns.

▶ The site engineer of the plant explained the process of manufacturing the transformers. Students were surprised to know the various design aspects in the manufacturing process in the plant and appreciated the curiosity of the site engineer for explaining the each and every details of the plant.

▶ The visit has definitely benefited the students and such type of visits will be arranged in future also by the college to make the students ready for the industry in terms of practical knowledge and better understandings of the technology.
